- Creat an Alerts

Scopus

About Scopus

- **Scopus** is a citation database that indexes journals, trade publications and conference proceedings in the health and natural sciences, social sciences, arts and humanities with citation data available from 1996 to present.
- **Scopus does not have complete citation information for articles published prior to 1996.**
- **Scopus** puts powerful **discovery and analytics tools** in the hands of researchers, librarians, research managers and funders to promote ideas, people and institutions.
- **Scopus** indexes content from 7,000+ **publishers** and includes 91+ million **records**, 94,000+ **affiliation profiles** and 17+ million **authors**.
- **Scopus's** state-of-the-art search tools and filters help uncover relevant information, monitor research trends, track newly published research and identify subject experts. Plus, analytics tools make it easy to visualize, compare and export the data.

Scopus

About Scopus

- **Scopus** includes the records from the MEDLINE and EMBASE databases, among other included sources.
- **Scopus** uses four broad subject areas: **Physical sciences, Health sciences, Social Sciences and Life Sciences.**
- **Scopus allows users to:**
 - Search for articles, conference proceedings, trade publications, and book chapters on a topic
 - Find author information, such as H-index, and lists of publications
 - Locate Impact metrics for a journal title using SNIP, SJR, and ...
 - Perform citation searches on known articles
 - Identify promising journals in which to publish
 - Match an organization with its research output
 - Locate potential collaborators or subject experts
 - Manage your impact with your ORCID ID
 - Set Citation Alerts

About Scopus

Scopus

Search Form

Scopus

Enter your first search term into the search field. If you have more than one concept to your search, select "Add Search Field" to add additional search fields, or conduct separate searches and combine them later using the "Search" button.

Scopus does NOT have MeSH terms or other subject headings on which to search. Scopus defaults to searching an article's Title, Abstract and Keywords. You can change this in Advanced (see the tab to the left for information on Advanced searching)

The screenshot shows the Scopus search interface. At the top left is the Scopus logo. To its right are navigation links: Search, Sources, Lists, and SciVal. Further right are icons for help, notifications, and a library icon, followed by buttons for "Create account" and "Sign in". Below this is the heading "Start exploring" with the subtext "Discover the most reliable, relevant, up-to-date research. All in one place." Underneath are three tabs: "Documents" (selected), "Authors", and "Affiliations", along with a "Search tips" link. The main search area contains a "Search within" dropdown menu set to "Article title, Abstract, Keywords" and a search input field containing "Search documents *". At the bottom, there are links for "+ Add search field", "+ Add date range", and "Advanced document search", followed by a "Search" button with a magnifying glass icon.

Advanced Search

Scopus

- On the Advanced search form, you can create a search using field codes, proximity operators, or boolean operators to narrow the scope of the search.
- To create an advanced search, Click "Advanced Search" from the main search page
- To search for keywords in an article's **title or abstract**, type in TITLE-ABS before your search terms.
- Be sure to use parentheses! For example, this is correct: (TITLE-ABS (children OR pediatrics))
- Scopus needs Boolean operators (AND, OR) to be capitalized.
- To exclude in Scopus, you must use AND NOT (not just 'NOT').

+ Add search field + Add date range [Advanced document search >](#)

Scopus

Author Name Search

- Scopus is a great place to look for information about a particular author's published works. You can start your search for information on Scopus's main search page by clicking "Authors." While Scopus is a compilation of peer-reviewed articles, it is not comprehensive, so keep in mind that you will only see information about the articles that

Start exploring

Discover the most reliable, relevant, up-to-date research. All in one place.

[Documents](#) [Authors](#) [Affiliations](#)

Scopus

Author Name Search

- Type in the author's last name, and first name if it will be helpful to locate them. It is often a good idea to put an Affiliation as well.

Search using: Author name ▾

Enter last name *
Westrick

Enter first name
Jennifer

Enter affiliation name
Rush

Scopus

Author Name Search

- The author's information will appear. To see all their published work that has been indexed into Scopus, click the box in front of their name and then click "Show documents."
- If you are checking on your own citations and notice that you have more than one listing, click "Request to merge authors."
- If this is your information and there are multiple BOXES for your name, you can merge them by clicking the "Request to merge authors" link and following the steps.
- For a visual representation of this author's work, click the box for All, then "View citation information."

<input type="checkbox"/> All ▾	Show documents	View citation overview	Request to merge authors	Save to author list

i Scopus Author Identifier ×

The Scopus Author Identifier assigns a unique number to groups of documents written by the same author via an algorithm that matches authorship based on a certain criteria. If a document cannot be confidently matched with an author identifier, it is grouped separately. In this case, you may see more than one entry for the same author.

Documents, whole institution: **22,493** | Documents, affiliation only: **21,438** | Authors: **4,825**

Total and specific document counts

Two sets of document counts may appear on this page:

"Documents, affiliation only"- Reflects the number of documents directly associated with that affiliation profile.

"Documents, whole institution" - Reflects the total number of documents associated with that institution - it is the sum of those from the institution itself plus those from the affiliations contained within its hierarchy. Where an institution is not the top level of the hierarchy, only the affiliations below it are included in its total.

Scopus

Documents Search:

The screenshot shows the Scopus search interface. At the top left is the Scopus logo. The top right contains navigation links: Search, Lists, Sources, SciVal, and icons for help and home. There are buttons for 'Create account' and 'Sign in'. Below the navigation is a 'Start exploring' section with the text 'Discover the most reliable, relevant, up-to-date research. All in one place.' and tabs for Documents, Authors, Researcher Discovery (marked as 'New'), and Affiliations. The search area features two search boxes. The first box is set to 'Search within Article title, Abstract, Keywords' and contains the text 'Covid-19'. The second box is also set to 'Search within Article title, Abstract, Keywords' and contains the text 'Diabetes'. Between the boxes is an 'AND' operator. Below the search boxes are links for '+ Add search field', '+ Add date range', and 'Advanced document search'. A 'Search' button is on the right. Below the search area is a 'Search History' section with a 'Saved Searches' tab. A single search entry is shown: '1 AU-ID ("pashazadeh, fariba" 57204568792)' with '33 results' and options for 'Set Alert' and 'More'. A note at the bottom states: 'Your history is available during this visit, but will be deleted after you leave Scopus. Click 'More' to 'Save' important searches.'

Export 20,839 documents to EndNote as a RIS file

The RIS format is used for exporting references from Scopus to a reference management tool (e.g., Zotero, EndNote, RefWorks). To import references to EndNote, open the .ris file with EndNote and follow the prompts. Make sure that .ris files are associated with EndNote on your system.

You can export up to 20,000 documents in RIS format.

About the new Search results page

We created an updated Search results page. Improvements include:

- Searching directly from the results page
- More interactive filters to narrow your results
- A more functional, intuitive layout
- Expanded export functionality

Want to learn more about the Search results page?

Scopus

Advanced Search:

The screenshot shows the Scopus Advanced Search page. At the top, there is a navigation bar with the Scopus logo, a search icon, and links for Search, Lists, Sources, SciVal, Create account, and Sign in. The main heading is "Advanced search" with a "Compare sources" link. Below this, there are tabs for "Basic Search" and "Advanced", with "Advanced" selected. A "Search tips" link is also present. The search input field contains the query: (TITLE-ABS-KEY(Covid-19) AND TITLE-ABS-KEY(Diabetes)). Below the input field, there are links for "Outline query", "Add Author name / Affiliation", "Clear form", and a "Search" button. To the right of the search area is a sidebar with "Operators" (AND, OR, AND NOT, PRE/, W/ with plus signs) and "Field codes" (Textual Content, Affiliations, Authors, Biological Entities, Chemical Entities, Conferences, Document, Editors, Funding, Keywords, Publication, References, Subject Areas with dropdown arrows). Below the search input, there are three example queries: ALL("Cognitive architectures") AND AUTHOR-NAME(smith), TITLE-ABS-KEY("somatic complaint wom?n) AND PUBYEAR AFT 1993, and SRCTITLE(*field ornith*) AND VOLUME(75) AND ISSUE(1) AND PAGES(53-66).

How Can I Assess Journal Impact?

Scopus

- Different measures are used to assess the quality and impact of a journal. These measures are one factor to consider when deciding where to publish your work.

Common Measures of Journal Impact

	Impact Factor (IF)	Eigenfactor	SCImago Journal Ranking (SJR)	Source Normalized Impact per Paper (SNIP)
Measure of...	Frequency with which the 'average article' in a journal has been cited in a particular year or other defined time period	Measure of importance: overall value provided by all articles published in a journal in one year	Measure of prestige; accounts for number of citations received by a journal and importance of the journals that citations came from	Measures citation impact by weighting citations based on the total number of citations in a subject field
Calculation	<p>A: Number of citations in the current year to items published in the journal in the previous two years</p> <p>B: Total number of articles published in the journal in the previous two years</p> <p>Impact Factor = A/B</p>	Citations from high-quality journals are weighted more than citations from lesser known journals	Citations from more prestigious journals (higher SJR) weighted more than citations from less prestigious journals (lower SJR)	Citations from subject fields in which citations are less likely are weighted more
Can it be used to compare journals from different disciplines?	No	Yes	Yes	Yes
Where can I get it?	Journal Citation Reports OR the journal's website	Journal Citation Reports OR free from Eigenfactor.org	Scopus OR free from SCImago Journal & Country Rank	Scopus OR free from CWTS Journal Indicators

Journal Impact in Scopus

Scopus

- [Scopus](#) is a resource for evaluating and comparing journals. Provides SCImago Journal Ranking (SJR) and Source Normalized Impact per Paper (SNIP) for more than 19,000 journals.
- The Compare Sources feature in Scopus can be used to view and compare the following metrics for up to 10 journals at a time:
 - SJR
 - SNIP
 - Number of citations received in a year
 - Number of documents published in a year
 - Percentage of documents published in a year that have never been cited
 - Percentage of articles that are review articles

Author Position ?
Based on 31 documents for 2013 - 2022

First author • 0%
Last author • 13%
Co-author • 84%
Corresponding author • 3%
Single author • 0%

View author position details >

Author position details ×

The Author position is the position relating to the responsibilities of an author among the co-authors. The Author position information is derived from the 31 documents published in the last 10 years (2013 - 2022).

First author • 0%
The author is the first one in the document

0	0	0
Documents	Average citations	FWCI

Last author • 13%
The author is the last one in the document

4	9	0.544
Documents	Average citations	FWCI

Co-author • 84%
The author is in any other position in the document

26	10	0.595
Documents	Average citations	FWCI

Corresponding author • 3%
The author is the corresponding one in the document

Citation Searching

Scopus

- To find citation counts in Scopus
- Search by the document's title
- In the results list, look in the far-right hand column for the citation count.
- To see what documents cited the document, click on the citation count.

Creating alerts

Scopus

- By registering as a Scopus user, you are able to [create search, document, and author alerts](#) to stay up-to-date at your desired frequency. Use these alerts to receive email notices when new documents are loaded on Scopus. From the Alerts page, you can create alerts, view the latest results for an alert, edit alerts, and delete alerts. There is no limit on the number of alerts you can create.
- A Search alert is a saved search that you can schedule to run at certain intervals. If any new results are found, you will receive an email with the first 25 results and a link into Scopus to access all new results. You must be logged in to set an alert or work with your saved alerts.
- **To set a new search alert:**
 - From the [Document Search](#) page, perform a new search. The Search results page opens.
 - From the search results page, click **Set alert**. The Set Alert pop-up appears.
 - Set the frequency and day of week to start alerts.

Scopus

To set an author alert:

- From the Author page, perform a new search. The Search results page opens.
- From the search results page, click an author's name. The author details page opens.
- From the author details page, click **Get citation alerts**. The Set Alert Author Citation Alert pop-up opens.

Scopus

To set a document alert:

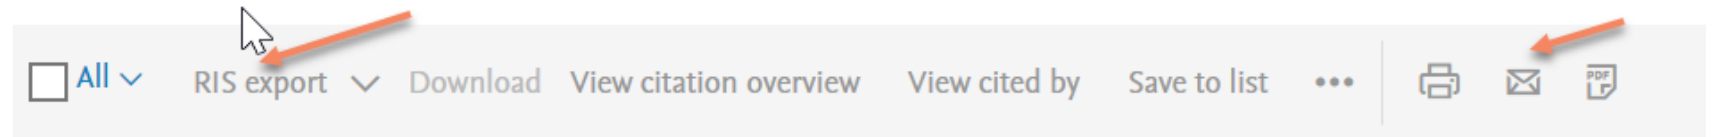

- From the Document search page, perform a new search. The Search results page opens.
- From the search results page, click an document's name. The Document details page opens.
- From the Document details page, click **Set citation alerts**. The Set Document Citation Alert pop-up opens.

Scopus

Exporting items to Citation Managers

- To export items to SciWheel, EndNote, Zotero, or another citation manager, look in the grey bar (found at the top of your search results) for the words "RIS Export." Note that you can also email citations (with links) to yourself in this bar.
- You can export or email individual citations using the links in this bar, or you can save citations into a List and export/email the entire list at once by using the List function. See "Saving Items in a List" in the tabs to the left for more information.

- The drop-down arrow next to "RIS Export" provides options for what information you'd like to export. We recommend checking of all boxes so that all information is sent.
- Clicking the "RIS Export" button will create a file that will be in your Downloads folder and will probably show in in the grey bar along the bottom of your screen.

Scopus

Analyzing Results

- Scopus offers several built-in functions for analyzing search results. You can find these options here:

AU-ID ("Neal-Perry, Genevieve Scott" 8927373200) OR AU-ID ("[No Author ID found]" 58010594800) OR AU-ID ("Wu, Ji" 57743109700) OR AU-ID ("Stringer, Elizabeth" 57743109700) OR AU-ID ("Timmons, Douglas B." 57724511000) OR AU-ID ("Jones, Hendrée" 57724511000)

Document title

1 Lifestyle intervention in ovarian cancer enhanced survival (LIVES) study (NRG/GOG0225): Recruitment, retention and baseline characteristics of a randomized trial of diet and physical activity in ovarian cancer survivors

Analyzing Results

Scopus

- The analysis tools provide a summary view of aspects of the search results, such as counts of publications:
- By author
- By document source (ex. Journal Title)
- By affiliation (author organization)
- By document type (ie. journal article, book chapter, etc.)
- And several other criterion

Create Bibliography

Scopus

- With Scopus, you can create a bibliography of articles on the fly.
 1. Select the articles in your search set that you would like to include in your bibliography. You can do this by checking off the boxes of the articles you want, or by using the "add to list" feature to just add those articles you want. When you add the articles to the list, your list will open. From there, select all.
- select articles to include and click on create bibliography

Create Bibliography

Scopus

- 2. Click on the three dots at the top right that indicate "more menu options". Select the option "Create Bibliography".

Print Save as PDF Bibliography: QuikBib

QuikBib allows you to generate a reference list (bibliography) from your selected documents in a variety of widely used output styles.

Format: HTML Text

Style: [APA 6th - American Psychological Association, 6t...](#) 

Selected style example:

APA 6th - American Psychological Association, 6th Edition

Author, A. A., Author, B. B., & Author, C. C. (2005).
Title of article. *Title of Journal*, 10(2), 49-53.
